

CL203: Database Systems lab

Lab Task 12[Index]

Submission: Submit a log file, make sure you marked each query properly. [To create a log file run the command `tee path_file`]

Use the table [Users] you have already created in labtask Triggers

Table 1: Users [user_id (p.k)]

user_id	username	password	email
1	abc123	def321	abc123@yahoo.com
2	xyz789	vbn123	xyz789@gmail.com

- Create a single-column index using attribute email
- Create a composite-column index using attributes username and password
- Display the list of indexes for table users
- What is implicit index and unique index?[Define it in 2 lines]
